# ATS1208

Using tables to format web pages

# Formatting in html

- Basic html allows very few possibilities for formatting text
- It doesn't even have tabs!
- Placing text and images together is also hard to control
- The next few slides will show some of these problems

# The solution - tables

- Using tables allows us to place elements on a page with much more control
- Generally we use tables with invisible borders for this
  - But you can make the table borders a design feature if you want
- TinyMCE is the editor Wordpress uses for posts and pages
- TinyMCE Advanced is a plugin which enhances that editor

# TinyMCE Advanced

Standard editor, limited options on toolbar

#### Add New Post Enter title here 9 Add Media File Edit Insert View Format Table Tools 💥 🗅 🌈 🗈 👁 Paragraph • B Libre Franklin 🔻 12pt ★ 4 Ω A 🔻 🆽 🖌 🚱 Word count: 0

#### Advanced editor, lots more options

# Tables in TinyMCE Advanced

# Putting elements in tables

Text and images can go in separate cells, the layout is cleaner already

# Refinements

General	Advanced				
Width			Height		
Cell type	Non	e 🔻	Scope	None	•
H Align	Non	e 🔻	V Align	Тор	•

aragraph 🔻 B I 😘 🗄 🛛 🗄	🗄 Table 🕨 🕨	2 7 1 🖻 🖉 🧿
bre Franklin 🔻 12pt 🔹 🛒 🚏	Table properties	• III • 0
Images of the Clayton Campus by	Delete table	
Wolfgang Sievers	Cell	Table cell properties
Menzies Building under construction	Row	Menter table cells
c1969	Column	Split table cell

Position of text in a cell can be controlled for both horizontal and vertical alignment: Select a cell then: Table > Cell > Table Cell Properties

Text wraps in a cell when next cell is empty? You can merge cells Select the cells then: Table > Cell > Merge table cells

# Looking good!
